Hazardous Weather

Day 2-3 Weather Hazards

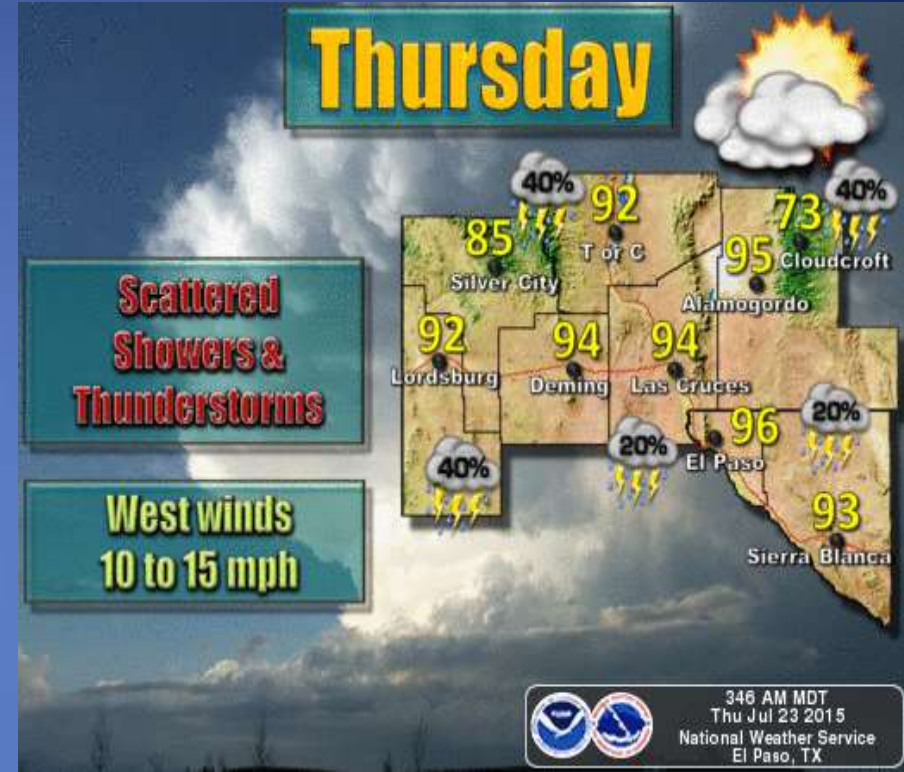

Valid: 0800 Fri - 0800 Sun

Hazardous Weather

Temperatures will warm a few degrees above normal across southeast New Mexico and southwest Texas today. There will be scattered thunderstorms mainly in the mountains, with more isolated storms over the adjacent plains. Stronger storms will produce brief heavy rainfall, frequent lightning and winds gusts up to 50 mph.

Looks like the same story, different day for the Borderland on Thursday as monsoon moisture and instability persist across the area. Aloft, a high pressure center will continue over much of Texas and southern New Mexico. This will limit overall thunderstorm production. However, scattered thunderstorms are still expected. With the plentiful moisture available, a few of these storms will likely produce heavy rain and local flooding.

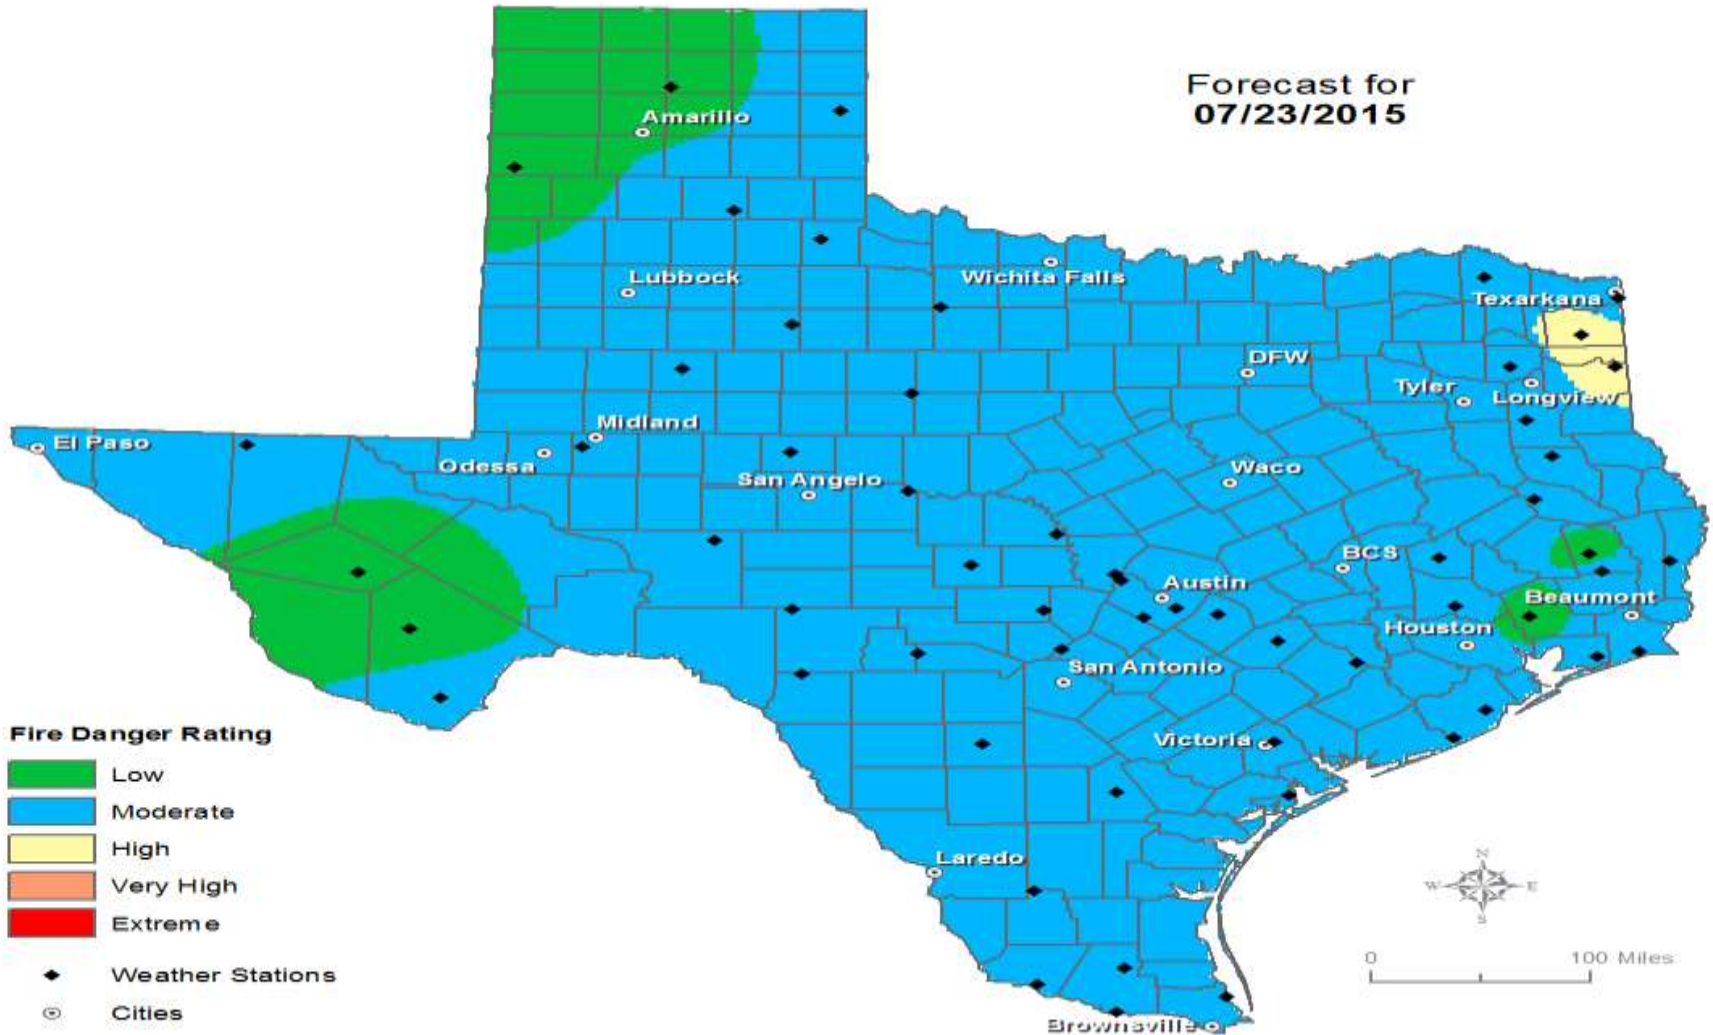

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
07/22/15	Urban and Arroyo Flood Advisory	El Paso County
07/22/15	Flood Warning Continues	Elm Fork Trinity River Near Carrollton affecting Dallas County
